**Course Description**

The objective of this course is to provide you with a basic understanding of accounting as "the language of business". It introduces students to the basic concepts, principles, procedures and approaches underlying the accounting process. The eventual goal is to support students to have interest in "accounting" itself. However, I warn that this course will not be an easy-going course. You will experience "excessive assignments, frequent exams and quizzes, and big projects".

**Learning and Teaching Structure**

The class will be conducted on a combination of lecture and problem-solving basis. The emphasis will be on understanding and applying basic accounting principles and other concepts that guide the reporting of the effect of transactions and other economic events on the financial condition and operating results of a business
